Bijo Shaji

Full Stack Developer

Kollam, Kerala, India | +91 9995753267 | bijoshaji92@gmail.com | linkedin.com/in/bijo-shaji- | github.com/bijo-shaji

Professional Summary

Python Full-Stack Developer with hands-on experience building secure and scalable web applications using Python, Django, Django REST Framework (DRF), React.js, PostgreSQL, and Docker. Completed a full-stack internship contributing to enterprise application development, REST API implementation, authentication, and database management. Strong foundation in backend development, frontend integration, and problem-solving. Seeking a Full-Stack Developer, Python Backend Developer, or Software Development Engineer role.

Technical Skills

Programming Languages:	Python, Go (Golang), JavaScript
Frameworks & Libraries:	Django, Django REST Framework (DRF), React.js
Web Technologies:	HTML5, CSS3, Tailwind CSS, Bootstrap
Databases:	PostgreSQL, MySQL, SQLite
Developer Tools:	Git, GitHub, Docker, Postman

Experience

Jr. Python Full-Stack Intern Apr 2026 – July 2026
Knovista Technologies Pvt. Ltd. Ernakulam, Kerala, India

- Built and shipped REST APIs with Django REST Framework and JWT authentication, connecting the React.js frontend to role-based backend services for an internal asset and inventory management platform (SAIMS).
- Designed PostgreSQL schemas and optimized SQL queries to support asset tracking, employee assignment, and IT support ticketing modules.
- Delivered responsive React.js interfaces integrated with backend REST APIs, improving usability for non-technical end users.
- Containerized the application with Docker to standardize development and deployment environments across the team.
- Collaborated in an agile workflow using Git and GitHub feature branches, pull requests, and code reviews with team members.

IT Industry Practice Program (Internship) Jun 2025
Faith Infotech Academy, Technopark Trivandrum, Kerala, India

- Built a full-stack MERN application, gaining production-style exposure to frontend development, backend development, and database integration in a real-world team setting.

Projects

SAIMS – Smart Asset & Inventory Management System *Python, Django, DRF, React.js, PostgreSQL, JWT, Docker*

- Developed a full-stack enterprise platform for asset lifecycle management, inventory monitoring, and IT support tickets with role-based access and an analytics dashboard.

FaceGuard AI – Face Recognition Attendance System *Python, OpenCV, face_recognition, Streamlit*

- Built an AI-powered attendance system with real-time face detection and anti-spoofing checks, cutting manual attendance effort for a 3-role user base (student/teacher/admin).

Relokart – Relocation Assistance Platform *Python, Django, SQLite, Bootstrap*

- Built a full-stack platform for finding rental housing and relocation services, including secure authentication, listings management, and an admin dashboard.

Online System for Household Services *PHP, MySQL, HTML, CSS, JavaScript*

- Built a web-based platform for booking household services such as plumbing, electrical work, and cleaning, with user registration and an admin panel for managing providers and requests.

Quality Brewers – Wine Quality Prediction *Python, Scikit-learn, Pandas, NumPy*

- Trained a machine learning model to predict wine quality from physicochemical properties, covering data preprocessing through evaluation.

Education

Master of Computer Applications (MCA) Aug 2024 – Mar 2026
Mar Athanasios College for Advanced Studies (MACFAST – Autonomous) Tiruvalla, Kerala, India

Bachelor of Science, Computer Science Sep 2021 – Apr 2024
University Institute of Technology, Yeroor Yeroor, Kerala, India

Certifications

- Python for Data Science – NPTEL, IIT Madras
- Full Stack Web Development (MERN Stack) – Capital Infotech
- AI for Beginners – HP LIFE & UNIDO
